PERSONAL STATEMENT

About me

My interest in computing and entrepreneurship was sparked when I was 8 in primary school with the nostalgic 2000s game, Maplestory. Through my addiction to this game, I was exposed to a group of like-minded individuals who wanted to customize and elevate their gameplay experience. This brought me to the world of building private servers. My inexperience with code in primary school pushed me to explore further – watching online tutorials and interacting with a close-knitted community of Maplestory enthusiasts set in motion our goal of creating our own private server. Eventually, we succeeded in incorporating codes to create custom servers that delivered a novel experience for players. I was marveled by the impact a few lines of code could bring about.

The delight from seeing players experience Maplestory uniquely inspired me to pursue the bigger goal of realizing greater positive experiences for the world. Just like how I had improved the experience of a small group of players in the private server I contributed to in primary school, I endeavor to achieve this at a greater scale – I aim to enhance users' standard of living through the unique delivery of solutions via disruptive innovation one day.

Internship objectives

I am excited to contribute to a common vision in the next generation of products that would potentially disrupt the world. I am curious and want to expand both my entrepreneurial and technical skillsets. I understand it is a tough battle to bring an idea into reality and am looking forward to learning about what is needed to successfully bring a product from ideation, to market validation, execution, and finally into a scalable reality. At the same time, I hope to learn from my mentors and peers about their experiences and hone my technical skillsets such that I can better contribute to the company.

How I can contribute

I am a generalist that learns fast. My strengths lie in my ability to be adaptable and learn the skillsets for new roles quickly and efficiently. This could be varied from learning skills about completely different verticals or learning about new technologies and frameworks. I enjoy learning new things and have been exposed to vastly different experiences such as technical roles, a Sales role in a logistics company, a Compliance intern at an audit firm, and have also been actively working with a social media agency to help push their marketing campaigns. Thus, I believe my varied experiences would allow me to contribute better and be comfortable with taking on several hats if needed. Being a software engineer by training, I am also proficient in the agile methodology and full stack development. I am also always excited to learn about new technologies or frameworks that would enable me to contribute better.

EDUCATION

National University of Singapore Aug 2019 to Present

- Bachelor of Computing in Computer Science (Undergraduate)
- Expected Graduation: Aug 2023
- Current Cumulative Average Point: 4.36/5.0

Nanyang Junior College Jan 2015 to Dec 2016

- *Singapore-Cambridge* General Certificate of Education Advanced Level
- Subjects: Economics(A), Math (A), Chemistry (A), Physics (B), General Paper (B)

MY WORKS

Singapore Civil Defence Force (Save-A-Life Initiative) Mar 2021 to Present

Team Lead / Software Developer

- Developed a full stack campaign website for SCDF to promote the launch of a new mobile application (myResponders) from the Save-A-Life initiative.
- The website enabled Singaporeans to learn more about the initiative and take part in promotional contests related to the initiative.
- Utilised ReactJS, Firebase, HTML and CSS.

Uniquirk Spark AR Instagram Filters Nov 2020 to Present

Team Lead / Software Developer

- Developed Instagram filters such as short games, aesthetic filters, or "fortune-telling" filters to spread exposure of a local social media startup Uniquirk.
- Achieved an outreach of ~20k impressions through these filters.
- Utilised Spark AR and Javascript scripts.

Trippyy May 2020 to Dec 2020

Team lead / Software Developer

- Designed and developed a travel web application that integrates algorithms to automatically suggest convenient and well-thought-out itineraries which are optimized in terms of geo-convenience, time, and costs based on user input.
- Utilised ReactJS, Redux, Django, HTML, CSS and Google APIs.
- Project demo: https://youtu.be/bDtzUbDFLvY

Workforce Singapore (HTML Newsletter) Nov 2020 to Dec 2020

Team Lead / Software Developer

- Developed a HTML email newsletter for Workforce Singapore to educate Singaporean businesses about new governmental initiatives.
- Ensured compatibility of newsletter across all email servers (Gmail, Outlook, etc..) for both mobile and desktop responsive versions.
- Utilised HTML with inline CSS.

EXPERIENCE

PricewaterhouseCoopers Mar 2019 to Aug 2019

Risk Assurance and Regulations Compliance Intern

- Automated Excel procedures to extract data via writing scripts with Excel VBA, increasing efficiency in handling large volumes of insurance cases.
- Conceptualized and streamlined documentation workflow during project infancy stage with a client Insurance company in order to accurately meet compliance regulations, set out by the Monetary Authority of Singapore (MAS).
- Spearheaded analysis and consolidation of data required for ad-hoc reports and projects.

Panalpina World Transport Nov 2018 to Mar 2019

Sales Support Intern

- Automated Excel procedures to create quotations via writing scripts with Excel VBA, improving efficiency of day to day operations.
- Responsible for pricing analysis and generated quotations for SME businesses.
- Assisted Business Development Managers and Key Account Managers with new and existing businesses and joined on business meetings.

SKILLS SETS AND PROFICIENCY

Web development:	ReactJS	Proficient
	Redux	Proficient
	Django	Intermediate
	Flask	Basic
	Bootstrap	Proficient
Programming Languages:	Javascript	Proficient
	Java	Proficient
	Python	Proficient
	C	Intermediate
	HTML	Proficient
	CSS	Proficient
